

Fruit and Vegetable Industries:

A secure and sustainable food and floral supply – domestic and worldwide – thrives with strong and reliable access to global markets. Targeted use of tariffs can be a tool for addressing challenges or inequities between trading partners. However, the broad application of this blunt tool often disrupts markets, increases costs for consumers, and places unnecessary strain on growers and producers across the supply chain. This is particularly concerning as countries grapple with inflationary pressures, supply chain vulnerabilities, and economic uncertainty. Rather than imposing sweeping tariffs that disrupt trade and limit opportunities, IFPA advocates for swift and meaningful regulatory relief and reform as the most effective way to support and strengthen agriculture. We look forward to working with the Trump administration to advance policies that empower growers, expand market access, and ensure a competitive, resilient agricultural sector that benefits producers and consumers.

IFPA invites you to participate in industry advocacy efforts to influence trade policies and support measures that benefit the produce and floral industries. The Washington Conference is the premier event that unites all segments of the fresh produce and floral industry to address the most pressing public policy matters with the US Congress and Administration.
